

# Install Docker Toolbox on Mac

Download: <https://download.docker.com/mac/stable/DockerToolbox.pkg>

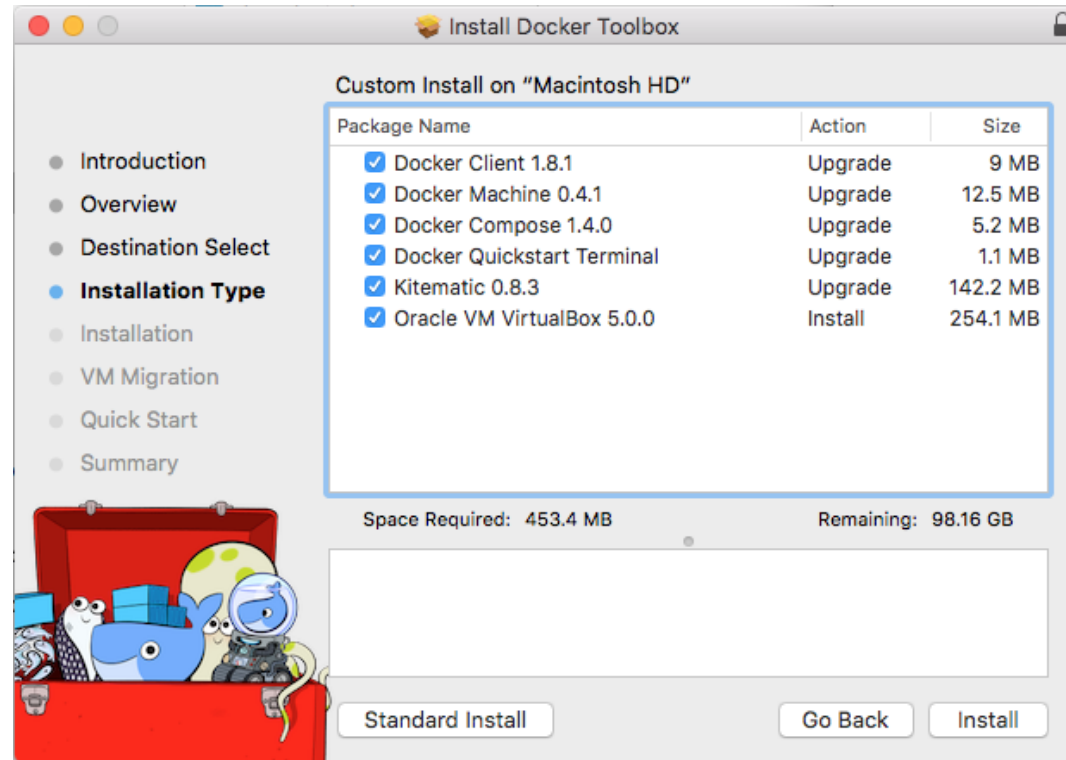

# Install Docker Toolbox

1. Install Docker Toolbox by double-clicking the package.
2. Press Continue to install the toolbox.

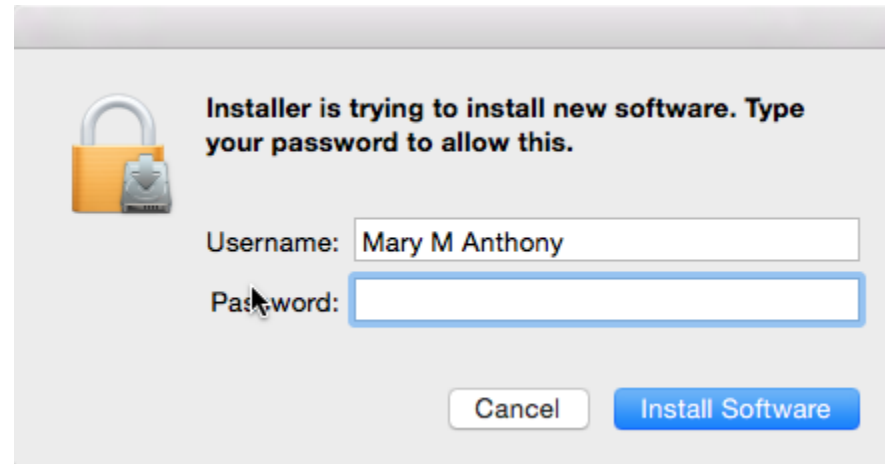

# Install Docker Toolbox

3. Press Install to perform the standard installation.

# Install Docker Toolbox

4. Provide your password to continue with the installation.

# Install Docker Toolbox

5. When it completes, the installer provides you with some shortcuts. You can ignore this for now and click Continue.

# Install Docker Toolbox

6. Then click Close to finish the installer.
