Install Docker Toolbox on Windows
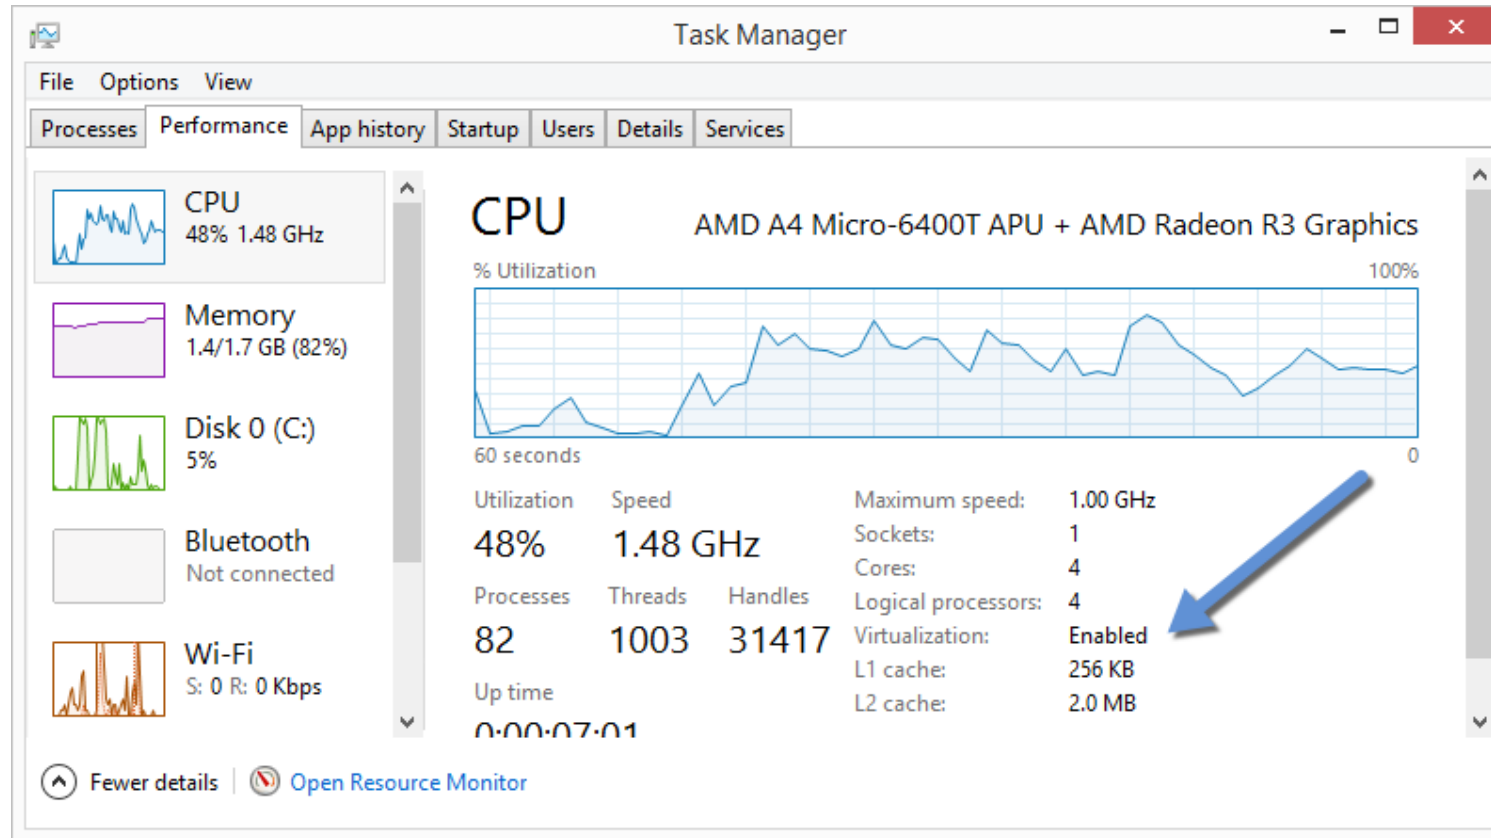

Download: https://download.docker.com/win/stable/DockerToolbox.exe

Step 1: Check Hardware Virtualization Technology and that virtualization is enabled.
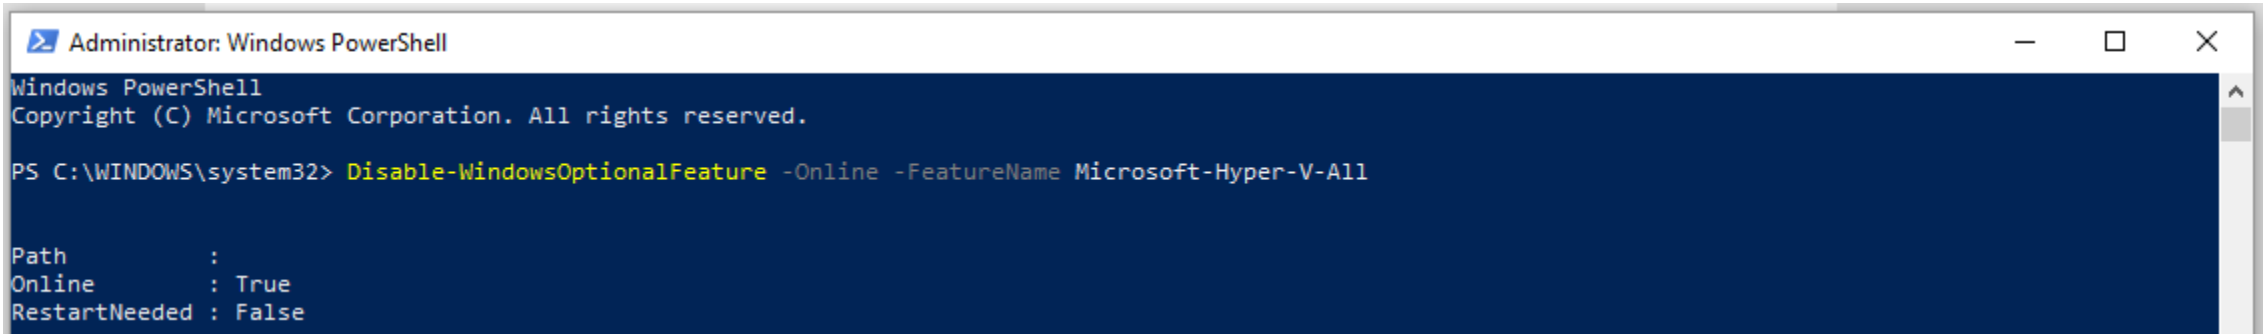

For Windows 8 or 8.1

Choose **Start** > **Task Manager** and navigate to the **Performance tab**. Under CPU you should see the following:

Step 2: Disable WindowsOptionalFeature -Online -FeatureName Microsoft-Hyper-V-All

1. Open PowerShell by "select windows powershell" and run as administrator

2. Run command " Disable-WindowsOptionalFeature -Online -FeatureName Microsoft-Hyper-V-All"

```
Administrator: Windows PowerShell                          —    □    ×

Windows PowerShell
Copyright (C) Microsoft Corporation. All rights reserved.

PS C:\WINDOWS\system32> Disable-WindowsOptionalFeature -Online -FeatureName Microsoft-Hyper-V-All

Path          :
Online        : True
RestartNeeded : False
```

Step 3: Install Docker Toolbox

1. Install Docker Toolbox by double-clicking the.

2. The installer launches an introductory dialog, followed by an overview of what's installed.

Step 3: Install Docker Toolbox

4. When notified by Windows Security the installer will make changes, make sure you allow the installer to make the necessary changes.

5. When it completes, the installer reports it was successful.
